

IN THE CLAIMS

Please amend claims 1-7, 10 and 12.

New claims 20-27 have been added.

Unchanged claims are included for the convenience of the Examiner.

1. (Currently Amended) An apparatus, comprising:

a housing;

a handle coupled to the housing, the handle extending beyond a top edge of the housing to provide a top edge clearance and extending away from a back side of the housing to provide a back side clearance, wherein the handle is to remain in a fixed position;

a keyboard tray coupled to the housing, the keyboard tray including a stand and a keyboard, wherein the keyboard tray is unfolded from the housing to support the housing in an upright position.

2. (Currently Amended) The apparatus of claim 1, wherein the housing includes a front side and a back side, and wherein the handle is coupled to the housing at the back side of the housing.

3. (Currently Amended) The apparatus of claim 2, wherein the handle is affixed solidly or semi-solidly to the back side of the housing.

4. (Currently Amended) The apparatus of claim 3, wherein the handle is [stationary] to remain in the fixed position regardless of the position of the keyboard tray relative to the back side of the housing.

5. (Currently Amended) The apparatus of claim 4, wherein the keyboard tray is coupled to the housing at the back side of the housing and below the handle.

6. (Currently Amended) The apparatus of claim 5, wherein the keyboard tray is coupled to the housing at substantially [near] toward bottom edge of the back side of the housing using a hinge mechanism.

7. (Currently Amended) The apparatus of claim 6, wherein the hinge mechanism is to enable [enables] folding or unfolding of the keyboard tray relative to the back side of the housing.

8. (Original) The apparatus of claim 8, wherein the keyboard is retractable relative to the keyboard tray.

9. (Original) The apparatus of claim 8, wherein the keyboard is a wireless keyboard.

10. (Currently Amended) The apparatus of claim 8, wherein the keyboard tray further includes a remote control device, wherein control mechanisms associated with the remote control device are positioned on a first surface of the remote control device.

11. (Original) The apparatus of claim 10, wherein the remote control device is capable of sending infrared (IR) signals.

12. (Currently Amended) The apparatus of claim 10, wherein the remote control device includes a pad that can be used for a cursor control device, wherein the pad is positioned on a second surface opposite to the first surface.

13. (Original) The apparatus of claim 10, wherein the keyboard tray further includes a wireless telephone handset.

14. (Original) The apparatus of claim 14, wherein the wireless telephone handset is to include a Bluetooth communication module.

15. (Original) The apparatus of claim 7, wherein the front side of the housing includes a display screen.

16. (Original) The apparatus of claim 15, wherein the front side of the housing further includes a fingerprint sensor.

17. (Original) The apparatus of claim 16, wherein the front side of the housing further includes a video camera.

18. (Original) The apparatus of claim 17, wherein the front side of the housing further includes one or more speakers.

19. (Original) The apparatus of claim 18, wherein the front side of the housing further includes an array of one or more microphones.

20. (New) An apparatus, comprising:

a keyboard tray including a wireless keyboard, the keyboard tray coupled to a stand, the keyboard tray slide-able into or out of the stand, wherein the stand is coupled to a housing at proximally a bottom edge of the housing and foldable relative to the housing, and wherein the housing includes a display screen and a fixed carrying handle.

21. (New) The apparatus of claim 20, wherein the stand is to support the housing in a substantially upright position

22. (New) The apparatus of claim 21, wherein the keyboard tray further includes the remote control and a telephone handset, and wherein the remote control is to transmit signals using Bluetooth communication protocol.

23. (New) A system, comprising:

a processor;

a display coupled to the processor;

a first communication interface coupled to the processor, wherein the display, the processor and the first communication interface are included in a housing; and

a wireless telephone handset coupled to the first communication interface to be used for voice over Internet protocol (VoIP) calls, wherein the wireless telephone handset is adapted to fit in a slot in a keyboard tray coupled to a stand, wherein the stand is to support the housing in a substantially upright position, and wherein the housing is transportable using a fixed handle coupled to the housing.

24. (New) The system of claim 23, wherein the first communication interface is to be used for short range wireless communication.

25. (New) The system of claim 24, wherein the short range wireless communication is based on Bluetooth communication protocol.

26. (New) The system of claim 25, further comprising:  
a second communication interface coupled to the processor, wherein the second interface is to be used for wireless local area network (WLAN) communications and to support the VoIP calls.

27. (New) The system of claim 26, further comprising:  
a keyboard coupled to the processor, the keyboard included in the keyboard tray.
